Q10

To what extent are the NSW environment, industries and communities currently impacted by invasive species?

Quite badly in places

Q11

To what extent do you think existing programs in NSW are effectively managing invasive species?

Not well

Q12

What, if any, are the key barriers to effective management of invasive species?

Not enough people on the ground to implement programs for control

Q13

How has invasive species management changed since the introduction of the NSW Biosecurity Act 2015 legislation and associated programs and plans?

I don't know

Q14

What are the future risks posed by invasive species to the NSW environment, industries and communities?

Invasive species do just that, invade! They compete with or wipe out native or farm species

Q15

What opportunities do you see to improve the outcomes of invasive species management in the future?

Programs could be implemented early to control invasive species before they get settled in. Groups of younger people on the dole could learn bush regeneration as a future avenue of work
