Q1

First name

[REDACTED]

Q2

Last name

[REDACTED]

Q3

Respondent skipped this question

Organisation name (if relevant)

Q4

Email address

[REDACTED]

Q5

Phone number

[REDACTED]

Q6

Yes

Can we contact you about your submission (if required)?

Q7

I am a private land manager/owner

What best describes you?

Q8

Central Tablelands

Which of the following regions best describes your location/area of interest?

Q9

The Commission publishes submissions on its website for transparency. If you do not want your personal details or responses published, please tell us below.

I agree to have my submission published anonymously – please remove my name and company/organisation before publishing

Q10

To what extent are the NSW environment, industries and communities currently impacted by invasive species?

A lot of invasive species are out of control. Its just a matter of time before someone is attacked (injured or killed) by wild dogs. I wouldn't go bush walking in a National Park without a big stick that goes bang.

Q11

To what extent do you think existing programs in NSW are effectively managing invasive species?

Most are not very effective at all

Q12

What, if any, are the key barriers to effective management of invasive species?

Lack of funding, trained personnel, political awareness and community inability to get on top of so many problem species

Q13

How has invasive species management changed since the introduction of the NSW Biosecurity Act 2015 legislation and associated programs and plans?

Haven't noticed any change or improvement in invasive species management, just more invasive species every year

Q14

What are the future risks posed by invasive species to the NSW environment, industries and communities?

I can see some agricultural pursuits becoming unviable/uneconomic in some areas. You can't be green if you are in the red

Q15

What opportunities do you see to improve the outcomes of invasive species management in the future?

There should be fines for property owners, businesses, local councils, road authorities (Govt departments & Crown Land), anyone and everyone if they don't adequately control/remove invasive species from their area of responsibility

Q16

Any other comments?

What about a Tax incentive of say 150% on the costs of removing/controlling invasive species
