Subject: Feral animals

[REDACTED]

As a veteran horticulturist in the Illawarra I would like to see more resources thrown at the deer population. It is heartbreaking to see local regeneration destroyed by deer , as if our flora and fauna don't have enough to deal with. There are huge ramifications for the loss of species on the escarpment , as well as the danger these animals pose to humans in urban areas. Please find a way to protect our natural environment from more harm Regards, Brian wardhaugh
