

**Submission to water sharing plan review – Murrah-Wallaga Area Unregulated and Alluvial Water Sources 2010, July, 2020.**

**This submission is from the Tilba Tilba Water Users Association Inc, [REDACTED],**

The Tilba Tilba Water Users Association Inc manages a water supply from the Bobundra Creek which provides a mix of allocations to properties in the Tilba Tilba village and its immediate surrounds, under Work Approval [REDACTED]

The water supply has been managed successfully under licence to the Tilba Tilba Water Users Association Inc since the early 1990s. Throughout that period to date the water source has provided users with a reliable and continuous supply, notwithstanding periods when restrictions have been imposed as a result of limited rainfall and drought.

The Tilba Tilba Water Users Association Inc and its members regard access to this water source as highly valuable as it balances sensitive environmental requirements with access to a consistent supply for domestic, industrial and stock use. The unique nature of this historical water supply enhances its heritage value within the Tilba Conservation Area.

The Tilba Tilba Water Users Association Inc believes that the current Water Sharing Plan is meeting the needs of its members and users and fulfils all objectives.
