Q10

To what extent are the NSW environment, industries and communities currently impacted by invasive species?

Extremely impacted

Q11

To what extent do you think existing programs in NSW are effectively managing invasive species?

Not very effectively, farmers are the most educated people to determine how vermin should be controlled, but they are not listened to. There are too many environmentalists & uni students trying to handle these issues, with very very little experience, & therefore very little effective results.

Q12

What, if any, are the key barriers to effective management of invasive species?

farmers are the most educated people to determine how vermin should be controlled, but they are not listened to

Q13

How has invasive species management changed since the introduction of the NSW Biosecurity Act 2015 legislation and associated programs and plans?

Legislation & acts & all the red tape wont get the job done.
Simple, practical, proven methods by farmers will

Q14

What are the future risks posed by invasive species to the NSW environment, industries and communities?

Government officials & greenies are single biggest risk to our farms & environment.

Q15

What opportunities do you see to improve the outcomes of invasive species management in the future?

Listen carefully to landowners & farmers with real life, on the ground experience.

Q16

Any other comments?

Thank you for the opportunity to have our say.
