## Invasive Species Review - Have Your Say

**Q7**

What best describes you?

**None of the above (I have a general interest in the topic)**

Other (please specify):

Interested indigenous person

---

**Q8**

Which of the following regions best describes your location/area of interest?

**North Coast**

---

**Q9**

The Commission publishes submissions on its website for transparency. If you do not want your personal details or responses published, please tell us below.

**I agree to have my submission published with my name or company/organisation**

---

Page 2

**Q10**

To what extent are the NSW environment, industries and communities currently impacted by invasive species?

Since the floods in Lismore NSW, it's out of control along the river system and it is everywhere

---

**Q11**

To what extent do you think existing programs in NSW are effectively managing invasive species?

I've not seen anyone even attempting to control weeds killing our native flora and fauna

---

**Q12**

What, if any, are the key barriers to effective management of invasive species?

Small volunteer work groups work in a area where it can be transformed into a natural environment once again

---

**Q13**

How has invasive species management changed since the introduction of the NSW Biosecurity Act 2015 legislation and associated programs and plans?

Not sure although something else needs to be done, fire ants, viramites attacking bee colony's, we aren't doing enough yes boarder control Although it's still getting into the community and country

---

**Q14**

What are the future risks posed by invasive species to the NSW environment, industries and communities?

It's killing tourism destroying natural resources native forests which need help to conserve biodiversity and protect future generations

---

**Q15**

What opportunities do you see to improve the outcomes of invasive species management in the future?

Volunteers are required as it's widespread throughout Australia we need significant support from universities on how to improve the quality of our research programs and Volunteers to help change the landscape to its natural environment

---

**Q16**

Any other comments?

We need to come together and improve our beautiful landscapes

---
