**Q1**

First name

[REDACTED]

**Q2**

Last name

[REDACTED]

**Q3**

Organisation name (if relevant)

[REDACTED]

**Q4**

Email address

[REDACTED]

**Q5**

Phone number

[REDACTED]

**Q6**

Yes

Can we contact you about your submission (if required)?

**Q7**

None of the above (I have a general interest in the topic)

What best describes you?

**Q8**

Which of the following regions best describes your location/area of interest?

**None of the above (I have a general interest in the topic)**

,  
Other (please specify):  
KNP

---

**Q9**

The Commission publishes submissions on its website for transparency. If you do not want your personal details or responses published, please tell us below.

**I agree to have my submission published anonymously – please remove my name and company/organisation before publishing**

**Q10**

To what extent are the NSW environment, industries and communities currently impacted by invasive species?

Over growth of introduced plant species

---

**Q11**

To what extent do you think existing programs in NSW are effectively managing invasive species?

I disagree with aerial shooters and bait poisons .

---

**Q12**

What, if any, are the key barriers to effective management of invasive species?

They are targeting the wrong species . Feral pigs are a very big problem in KNP and the Murray/Darling regions

---

**Q13**

How has invasive species management changed since the introduction of the NSW Biosecurity Act 2015 legislation and associated programs and plans?

Regarding management it's not changed . You only have to look at introduced species been bought in to eradicate pests . Brumbies and dingoes are not the problem . Sorry I thin humans have worse impacts on NP 's and other area

---

**Q14**

What are the future risks posed by invasive species to the NSW environment, industries and communities?

Developing and clearing land poses more of a threat . Than the so called invasive species you are targeting

---

**Q15**

What opportunities do you see to improve the outcomes of invasive species management in the future?

Leave the creatures alone . No more culling , or aerial shooting . No more baiting dingoes . !!! It's down right disgusting ! Why do you wish to wipe out these species??

---

**Q16**

Any other comments?

Yes leave the alone they are not destroying the land . Go see the graders in there making mor damage than the brumbies . By killing them is not the answer . These are good stock horses. And dingoes clean up , food chain! Fires destroyed more than you know . I suggest you ask the people you know what is really going on in these areas . Australia is the worst country in the world for species to disappear !!

---
