Q10

To what extent are the NSW environment, industries and communities currently impacted by invasive species?

There is extensive infestations of lantana, blackberry, Scotch Broom, feral pigs and wild horses impacting on the National Parks system in the Mid Coast area of NSW.

Q11

To what extent do you think existing programs in NSW are effectively managing invasive species?

There is inadequate attention being given to removing and controlling the invasive species listed above.

Q12

What, if any, are the key barriers to effective management of invasive species?

Government funding of research and physical removal of species and on-going management.

Q13

How has invasive species management changed since the introduction of the NSW Biosecurity Act 2015 legislation and associated programs and plans?

Don't know.

Q14

What are the future risks posed by invasive species to the NSW environment, industries and communities?

For the Barrington Tops NP I fear that there will be a complete loss of its uniqueness and removal from the World Heritage classification.

Q15

What opportunities do you see to improve the outcomes of invasive species management in the future?

Community awareness and involvement is becoming more and more apparent. Government's need to respond with greater priority.
