**Q10**

To what extent are the NSW environment, industries and communities currently impacted by invasive species?

Huge impact. Every part of our national parks, forests and commercial lands are damaged by invasive species. It's impossible to calculate the cost of the that damage financially and environmentally.

---

**Q11**

To what extent do you think existing programs in NSW are effectively managing invasive species?

I think the current programs are doing the minimum needed to manage them.

---

**Q12**

What, if any, are the key barriers to effective management of invasive species?

Woke politics and the illusion of animal rights.

---

**Q13**

How has invasive species management changed since the introduction of the NSW Biosecurity Act 2015 legislation and associated programs and plans?

From my perspective people are more limited in their ability to cull.

---

**Q14**

What are the future risks posed by invasive species to the NSW environment, industries and communities?

See above.

---

**Q15**

What opportunities do you see to improve the outcomes of invasive species management in the future?

Sporting shooters offer a great opportunity

---

**Q16**

Any other comments?

We have to stop believing the rhetoric of extremist enviromentalist groups about animal rights and the like.
