Budget 2021 - 2022

- The Natural Resources Commission has maintained a fairly constant operational expenditure budget for the last 10 years.
- Changes to the expense budget over the past three years have been the result of Terms of Reference activities that are in addition to our core legislative functions.
- These Terms of Reference are not funded from the expense budget and require separate funding that has an impact of increased expenses whilst the work is being completed.
- The budget 2021 - 2022 released indicates there is a 25.8% decrease in the Commission's total expenses, this is the result of a peak workload arising from specific time limited Terms of Reference.
- This decrease has no impact upon the budget for our legislative functions such as reviews of Water Sharing Plans.
