Hi :

I & several of my friends strongly object to this outrageous proposal by Natural Resources Commission for Logging under the name of ecological thinning.

It will cause irreversible damage to a fragile ecosystem providing habitat for rare & endangered Flora & Fauna.

The majority of people realise we must move to more sustainable practices & protect our natural ecosystems & old growth forests from commercial interests.

National Parks, State Conversation Areas etc are set aside to protect our natural ecosystems from Logging , Cattle Grazing, Mining & other commercial interests .
