To whoever,

Please reconsider what logging of any sort would do in the Nandewar and Brigalow State Forests.

Our Children's future not to mention the delicate environment are at stake.

Damn the Loggers! Short term timber use and jobs would result in so much devastation from which the forests would never recover. Look instead at the tourism possibilities if you must.

I strongly oppose any sort of logging for any reason and would certainly remember this as my number one concern come the next election.

M O'Neill
