TO ALL CONCERNED AT NRC.

\$51million was paid by NSW taxpayers in 2005 to protect declared Brigalow and Nandewar Conservation areas from logging and grazing. To open up these areas now is totally irresponsible and sets a dangerous precedent for our National Parks.

Do not allow commercial logging in any form on the National Parks Estate. Essential habitat for Native Wildlife will be destroyed.

It is time the Government stopped catering to commercial businesses for their monetary gain, once our forests are destroyed there will be no environment and no wildlife which are necessary for future generations. Renewable Energy is the only way forward for our Environment and will provide far more jobs than the current outdated methods.

Sincerely,
Rhonda Green.
