Subject: Proposed Selective Logging of Brigalow and Nadewar Conservation Areas.
Date: Sunday, 27 July 2014 4:58:07 PM

This is a submission to oppose the proposed selective logging of the Brigalow and Nadewar Conservation Areas.

There are many reasons which others will be presenting and which I will agree with. The reason which stands out is that in 2005 taxpayers paid \$51 million to the timber and logging industries in compensation to protect the area. For the industry to propose logging in any form would be double dipping on their part. It would be corruption and a flagrant disregard of taxpayers, as well as the environment.

Ruth Haig
