Subject: Changes to laws governing State Conservation Areas
Date: Saturday, 26 July 2014 12:02:42 PM

Dear Sir

Please don't change laws protecting State Conservation Areas. Natural bushland is a precious resource to protect threatened and vulnerable plant and animal species and natural eco systems. It is not a resource to be exploited for short term financial gain. In this world of diminishing natural environment and climate change it is vital to protect every inch of precious bushland.

Yours faithfully
Yvonne Langshaw
