Q1
First name
[REDACTED]

Q2
Last name
[REDACTED]

Q3
Email
[REDACTED]

Q4
Can we contact you about your submission (if needed)? Yes

Q5
Can we add your email to our mailing list for occasional updates on this topic? Yes

Q6
What best describes you? Other (please specify).: Member of nature conservation organisations

Q7
What best describes your main regional interest? None of the above (I have a general interest in the topic)

Q8

Your submission may be published. If you do not want your personal details or responses published, please tell us here.

I agree to have my submission published anonymously
– please remove my name before publishing.

Q9

What do you consider is the most significant action(s) we can undertake to protect and restore biodiversity and ecosystem function on private lands?

Review and improve the regulations on clearing with the aim of promoting conservation of habitat and ecosystems whilst enabling sustainable farming - an integrated approach.

Q10

How can we further improve soil, water and vegetation management to protect and restore biodiversity while delivering sustainable economic outcomes?

Incentives to landholders to retain original or regrowth native vegetation. Soil and water management generally do not benefit from land clearing. Cheaper to conserve than to replant.

Q11

What do you consider is the most effective way to further support and enable landholders to deliver sustainable land management and production outcomes?

Register and maps of land; communication to landholders as to what is expected of them. In the short term this will need more work, staff, resources until it is bedded down.

Q12

Is there any other information about this topic you would like to share with us?

"The economy depends on the environment."
