Q3

Email
[REDACTED]

Q4

Yes

Can we contact you about your submission (if needed)?

Q5

Yes

Can we add your email to our mailing list for occasional updates on this topic?

Q6

I am a private land manager/owner.

What best describes you?

Q7

Statewide NSW

What best describes your main regional interest?

Q8

Your submission may be published. If you do not want your personal details or responses published, please tell us here.

I agree to have my submission published anonymously
– please remove my name before publishing.

Q9

What do you consider is the most significant action(s) we can undertake to protect and restore biodiversity and ecosystem function on private lands?

Make self-assessed land clearing illegal. Give clear guidance to landholders how to protect their land and soil by maintaining tree cover.

Q10

How can we further improve soil, water and vegetation management to protect and restore biodiversity while delivering sustainable economic outcomes?

Incentivise tree planting on private properties as wind breaks and in riparian zones

Q11

What do you consider is the most effective way to further support and enable landholders to deliver sustainable land management and production outcomes?

Educate landholders about the benefits of trees by promoting the existing examples

Q12

Is there any other information about this topic you would like to share with us?

The code-base land clearing allowances under the Land Management (Native Vegetation) Code 2018 should be changed. Laws relying on land-owners self-assessing whether they can clear their land or not have led to rampant clearing.
