Q4

Yes

Can we contact you about your submission (if needed)?

Q5

No

Can we add your email to our mailing list for occasional updates on this topic?

Q6

I am a private land manager/owner.

What best describes you?

Q7

North Coast

What best describes your main regional interest?

Q8

Your submission may be published. If you do not want your personal details or responses published, please tell us here.

I agree to have my submission published anonymously
– please remove my name before publishing.

Q9

What do you consider is the most significant action(s) we can undertake to protect and restore biodiversity and ecosystem function on private lands?

Most landowners want to improve the land they own - from a biodiversity and a long term value perspective- government should incentivise and help fund these improvements in the interests of all - we can't afford it on our own.

Q10

How can we further improve soil, water and vegetation management to protect and restore biodiversity while delivering sustainable economic outcomes?

Remove deer, pigs, cats, foxes and wild dogs. Remove lantana and Botox bush - help landowners do this.

Q11

What do you consider is the most effective way to further support and enable landholders to deliver sustainable land management and production outcomes?

Fund volunteer groups to remove invasive species and work with landowners.

Q12

Is there any other information about this topic you would like to share with us?
