Q1

First name
Cynthia

Q2

Last name
Brook

Q3

Email
[REDACTED]

Q4 Yes
Can we contact you about your submission (if needed)?

Q5 Yes
Can we add your email to our mailing list for occasional updates on this topic?

Q6 I am representing an NGO or community group.
What best describes you?

Q7 North Coast
What best describes your main regional interest?

Q8

I agree to have my submission published with my name.

Your submission may be published. If you do not want your personal details or responses published, please tell us here.

Q9

What do you consider is the most significant action(s) we can undertake to protect and restore biodiversity and ecosystem function on private lands?

Close scrutiny of land management practices and real time interventions when laws are being broken which means more staff for BCT and LLS. There has to be both carrot and stick and attempts to engender a culture of respecting ecosystems.

Q10

How can we further improve soil, water and vegetation management to protect and restore biodiversity while delivering sustainable economic outcomes?

Financial help is needed to enable farmers to protect the environment that benefits us all. Good examples of protecting natural assets should be publicised and appreciated by the general public so efforts are rewarded.

Q11

What do you consider is the most effective way to further support and enable landholders to deliver sustainable land management and production outcomes?

Engagement and education with relevant workshops and helping farmers be part of a supportive network who understand the challenges of being a responsible land manager.

Q12

Is there any other information about this topic you would like to share with us?

There is too much self interest in the self assessment codes and they need to be abandoned as they have clearly not worked with the acceleration in vegetation clearing. There has to be unambiguous laws which protect our natural assets into the future,
