Q4 Yes
Can we contact you about your submission (if needed)?

Q5 Yes
Can we add your email to our mailing list for occasional updates on this topic?

Q6 I am representing an NGO or community group.
What best describes you?

Q7 Greater Sydney
What best describes your main regional interest?

Q8

I agree to have my submission published with my name.

Your submission may be published. If you do not want your personal details or responses published, please tell us here.

Q9

What do you consider is the most significant action(s) we can undertake to protect and restore biodiversity and ecosystem function on private lands?

Map habitat and understand populations and their movements at a landscape scale to ensure habitat and habitat connectivity is retained and restored. Supporting landholders to maintain and restore habitat connectivity. Habitat loss and fragmentation is a huge driver of biodiversity loss and genetic diversity loss. We must ensure habitat is retained and restored so that species can move across the landscape, including safely across roads, to find new mates and to move when needed due to fire or climate change.

Q10

How can we further improve soil, water and vegetation management to protect and restore biodiversity while delivering sustainable economic outcomes?

Maintaining minimum setbacks from rivers and creeks can help provide natural wildlife corridors, provide cool refuge in the face of climate change and prevent erosion.

Supporting a societal shift toward valuing soil quality, water quality and biodiversity, recognising not only the intrinsic value of our diverse flora and fauna but also recognising that our entire economy depends on a healthy environment.

Q11

What do you consider is the most effective way to further support and enable landholders to deliver sustainable land management and production outcomes?

Working with and supporting landholders throughout the process.

Q12
