Q1

First name

Kath

Q2

Last name

Maze-Neeley

Q3

Email

[REDACTED]

Q4 Yes
Can we contact you about your submission (if needed)?

Q5 Yes
Can we add your email to our mailing list for occasional updates on this topic?

Q6 I am a private land manager/owner.
What best describes you?

Q7 North Coast
What best describes your main regional interest?

Q8

I agree to have my submission published with my name.

Your submission may be published. If you do not want your personal details or responses published, please tell us here.

Q9

What do you consider is the most significant action(s) we can undertake to protect and restore biodiversity and ecosystem function on private lands?

Remove the right to clear land that was previously cleared decades ago. It is an excuse to bulldoze or poison extensively areas of natural vegetation that has recovered from prior clearing. Also enforce regulations relating to vegetation management along creeks and rivers which no-body takes any notice of.

Q10

How can we further improve soil, water and vegetation management to protect and restore biodiversity while delivering sustainable economic outcomes?

Educate landholders about the ability to improve their economic outcome by retaining much or at least some of their native vegetation or, if they no longer have any, educate them on the benefits of re-establishing corridors of native vegetation.

Q11

What do you consider is the most effective way to further support and enable landholders to deliver sustainable land management and production outcomes?

Education and case studies showing the possible benefits.

Q12

Is there any other information about this topic you would like to share with us?

Good luck!
