Subject: NRCMA submission

Re your email of 18th November 2006

The proposed changes to the EOAM total 43 in all. NRCMA have no concerns with any of them.

We do note there is no reference to what our staff feel is a significant error that we recently advised PVP Service Center, about the definitions of low condition veg etc. Whilst it may not be appropriate to review this additional problem with these current changes, it is hoped NRC or DNR submit a change to EOAM re this matter in due course.
