Dear Ms Trenbath,

Re: Feral Native Species Listing – Yellow Mimosa

Although Yellow Mimosa does not appear to be a current threat in the Murray Catchment, from the distribution elsewhere in NSW it appears inevitable it will find its way along the watercourses in time, particularly if we see higher temperatures and more summer rainfall events. Therefore we would like to have Yellow Mimosa listed as a feral species so that if and when it appears, we can react quickly.

Yours sincerely,

David Leslie
General Manager
