

Dear Sir/Madam

NSW Natural Resources Commission

I wish to take this opportunity to make a submission and produce comments for consideration in regard to the state wide review of NSW pest animal management issues paper.

My submission will be brief, I have been hunting for approximately 30 years, most of that time has been for the purpose of harvesting and I believe we are very fortunate in this country to have so many resources and opportunities. I believe that if the direction that these submissions leads to is widespread eradication of resources, we should consider ourselves poor managers. This country /state has the ability to feed the world or at the very least feed ourselves.

I believe this review provides an opportunity to build businesses, employ many people, promote export, encourage tourism and encourage the Australian approach of ingenuity to overcome this new challenge so it can be treated as a way of creating prosperity.

In summary I strongly oppose waste and eradication and hope my thoughts and written words inspire.

Robert Rubesa
