

1. Dramatically increase the number of "R" licence public land hunting forests, as managed by NSW Department Primary Industries.
2. As a follow on from the current "Supplementary Pest Control" 3 year trial (Sporting Shooters Association Australia (SSAA NSW) are supplying qualified volunteer shooters to National Parks & Wildlife Service (NPWS NSW) to reduce pest animal populations in selected National Parks, Nature Reserves & State Conservation Areas) the program be continued, modified & expanded to include many more NPWS managed lands.
3. There is a reluctance by rural landowner/managers to use recreational shooters, due to the ratbag element of shooters who do the wrong thing, seemingly unprosecuted. I suggest that Police & relevant authorities be given more resources to catch & prosecute these people. Also that the justice system, via the Courts administer harsher penalties, rather than the "slap on the wrist" situation that presently exists.

Best Wishes,
Pat King.
