**SUBMISSION RE: SOUTHWEST CYPRESS REGION**

Our suppliers, Grants Sawmilling Co Pty Limited of Narrandera, New South Wales, have advised us of a current review being undertaken by the NSW State Government regarding the milling of cypress from State Forests.

Cypress is the most economical timber used in this area and the only timber known which white ants will not destroy. Most building renovations on houses etc over 25 years old require cypress to match existing walls, floors, roofing etc.

We see no reason why a well managed logging of the forests cannot be sustained under the current agreement.

Yours sincerely

MICHAEL COLES
