Re: South Western Cypress State Forests Assessments

I advise that I have been a self employed Electrician since completing the Certificate III in Electrical Fitter Mechanic, a period of conservatively six years.

During that period Grants Sawmilling Co Pty Limited has been an exceptional customer.

I have been involved in ongoing maintenance of the mill plant, along with assisting with the electrical installation of a number of significant capital additions and upgrades. This work has provided me with a considerable source of income, which has always been paid on a timely basis. It also has over the period assisted me with the employment of an apprentice electrician.

If the situation arose that because resource had been cut off due to the South Western Cypress Forest Assessment, my position would be greatly effected.

It would result in a dramatic decrease in annual income, I would have difficulty in meeting monthly commitments and would have to look closely at whether I would be able to continue to afford a full time employee.

I therefore respectfully request that you give consideration to the position of my employee, my family and my business when making your recommendations regarding the future of South Western Cypress Forest.

Yours sincerely

Jonathon W Taylor
