Subject: Cypress forest

Hi my name is Adam Noll the owner of Noll's bakery at condobolin and I have recently been told that we are in danger of loosing our cypress mill from a town's perspective I believe this would very detrimental as the local mill employs up to 12 local workers many of whom are young and would have to look to other areas for employment and facts will show that rarely do they return also as a business owner I think it continues a recent trend of major employers closing down as elders have recently closed and many businesses are under pressure as the ongoing drought continues to suck the life from small towns like ours I sincerely hope that our mill can remain operational and that the powers to be understand that communities like condobolin and families in those communities rely heavily on the primary businesses that can withstand current climate circumstances thankyou.

Regards Adam Noll
