Subject: submission to NRC

I Julian Domaracki own the Shell service station in Condobolin and would like to make a submission to the NRC stating my concerns regarding your proposals, some of the things that will affect me and my business and community.

There are 12 employees that work at the mill most shop at my service station at smoko and lunch; they also buy their fuel and other requirements during the rest of the week ,which in turn goes a long way to giving another member of the community employment.

On today's figures \$540,800.00 would be lost out of the community's economy if we only used the 13 employees directly affected yet if we extend it further through the community this figure would increase.

We have now been told that the NRC is reviewing the southwest cypress region this is causing uncertainty in community as to work and economy.

As a member of the Condobolin community I ask that the NRC be very mindful of the fact that a lot of lives can be affected by a wrong decision.

Yours in concern  
Julian Domaracki JP
