**Subject:** Please Save the River Red Gums

Please save the River Red Gums, we do not want to lose them. They are extremely valuable to the eco-system. They can not become another extinct item in Australia. We manage to lose so many plants and animals forever.

We need them , the river needs them as do all the birds and animals.  
Please protect them , definitely do not log them.

Please make the areas National Parks and protect these marvellous assets.

Kind regards  
Amanda Cubitt
