Subject: submission - red gum assessment

Dear Commissioners,

A renewable and sustainable resource managed by State government employing hundreds if not thousands of Australians along the food chain. River Red Gum is one of the great fuel sources in this Country and after working as a firewood supplier for the last 17 years I find it insulting to have my job and my partners job in the town of Deniliquin put at risk by Political manipulation in other parts of Australia. I work in a State Forest and have been personally involved in more than 3 fires mid week when Nobody has been within 10kms due to next to no tourism apart from Easter & Christmas (3weeks approx) - point being if I had not been at work these fires could have done anything.

Kind Regards  
Colin Moss
