ATTENDANCE FOR ONE

Hi Felicity Calvert,  
NSW Natural Resources Commission

I am coming to support the submission made by Keith Muir, executive director of the Colong Foundation for Wilderness Ltd. I am the secretary and non executive director of the Foundation. The River Red Gums best saviour, apart from regular rain, would be by the creation of new National Parks along the Murray and Murrumbidgee Rivers. Water means life. "While I live I'll grow". I don't want another Anthony Hordern's - It's a telling motto! The current rate of logging is not sustainable.

Ian Tanner
