Subject: Closure of the redgum forests around the Barham area

Please note that I am writing to object to the closure of the redgum forests around the Barham area. If it happens the effect on our town will be enormous. Our local sawmill employs a large number of people and if it closes the effect on our town will be extremely negative as people will be forced to move. Our town will go backwards in all areas. We are suffering enough from the drought let alone this.
